Algorithmic Fairness Ethical AI Machine Learning AI Explainability Policy Computational Social Science

Education

Northeastern University

Ph.D. in Computer Science (Advised by Dr. Christo Wilson)

Boston, MA

2019 - 2023

Indian Institute of Technology (IIT) Kharagpur

B.Tech. in Chemical Engineering, M.Tech in Financial Engineering, Minor in Computer Science

Kharagpur, India

2014 - 2019

Doctoral Thesis

Algorithmic Fairness in the Real World: Challenges and Considerations

Defended June 2023

- Social bias in machine learning algorithms is a widespread problem that has been addressed through various measures, but implementing fair machine learning systems in the real world is challenging due to issues like noisy demographic information, adversarial vulnerabilities, policy restrictions and complex interactions between humans and algorithms.
- In my thesis, I outline these problems in fair ML systems, with the aim to gain a more complete understanding of the issues involved and to be able to provide technical and policy recommendations to overcome their real world implementation challenges.

Grants

2025	Beyond Polarization: Fostering Plurality in Large Language Model Design and Development. (\$6K)	UCHI AI Seed Fund
2018	SGSIS Institute Challenge Grant. (₹1M)	IIT Kharagpur

Awards

2025	Winner Spotlight Poster	ICML '25
2024	Winner Best AI Art	CVPR '24
2023	Winner Best Paper	FAccT '23
2022	Winner Best Paper - Runner Up	Conpro '22
2019	Winner Best Poster	ECIR '19
2019	Dean's Fellowship for first Year PhD students (\$ 72K)	Northeastern University
2019	Winner Institute Order of Merit - Technology	IIT Kharagpur
2017	Silver Medal Stock Market Analysis	Inter IIT Tech Meet, Kanpur
2016	Gold Medal Software Development	Inter IIT Tech Meet, Mandi
2012	Governor's Medal National Rank 5, ICSE Board	Government of West Bengal
2010	NTSE Scholar National Talent Search Examination	NCERT

Teaching

Responsible Machine Learning

Northeastern University

Lecturer

Fall 2023

- Explores the ethical challenges and responsibilities of creating and deploying machine learning (ML) models.
- Biases in ML models, methods for uncovering them, and algorithmic fairness techniques to mitigate them
- Term project to apply algorithmic fairness to a real world scenario

Algorithmic Auditing

Northeastern University

Teaching Assistant for Dr. Piotr Sapiezynski

Spring 2022

- Designing audits that measure the effects of interests and control noise sources
- Minimize potential harms of audits to all stakeholders
- Legal bounds of algorithm audits
- Beyond audits: potential harms that cannot be measured through audits

Academic Experience

University of Connecticut

Storrs, CT

Associate Researcher at Connecticut Advanced Computing Center

Mar 2024 – Present

- Collaborating with Prof. Shiri Dori-Hacohen in the Risk and Information Ecosystem Threats (RIET) Lab on research and mentoring PhD students and Undergraduate Researchers on AI Alignment related projects as a visiting/associate expert.

Northeastern University

Boston, MA

Lecturer at Khoury College of Computer Sciences

Sep 2023 – Present

- Teaching CS 4973-05 Responsible Machine Learning to senior undergrads. With the help of readings, guest lectures and original course material, the focus of the course is to empower students to responsibly deploy ethical and fair machine learning models for societal benefit.

Northeastern University

Boston, MA

Research Assistant at Khoury College of Computer Sciences

Sep 2019 – Present

- Analyzing Fair ranking systems and showing how they fail in the presence of noisy protected attribute data. Also investigated adversarial attacks on the guaranteed fairness of retrieval systems.
- A cooperative fairness audit of the recommendation algorithm of [PyMetrics](#), a talent matching software. [Press Release](#).
- Investigated Facebook's Special Audiences system for opportunity advertisements and showed that the audience creation algorithm was still biased against women, seniors and minorities.
- Analyzed the ad reach and spend information obtained from Facebook's ad transparency feature and the personal targeting dataset from Propublica's Facebook ad dataset and showed that advertisers with higher budgets use more privacy sensitive targeting techniques like PII or Lookalike audiences. Findings published and presented at [IEEE ConPro 2019](#).

LIG, University of Grenoble Alps

Grenoble, France

Visiting Researcher

May 2019 – July 2019

- Study of how news companies promote different items on social media, investigating possible patterns of differential information spreading using both posts and ads.
- We also discovered and reported an exposed access token bug to [Facebook Bug Bounty](#).

IIT Kharagpur

Kharagpur, India

Undergraduate Researcher - Complex Networks Research Group

2014 – 2019

- Automated Extraction of Catchwords from Legal Documents using a novel NER tagger to help categorize lengthy legal texts.
- Automatically position user comments against relevant news article paragraphs. Presented at [ECIR 2019](#).
- Savitr - A real-time location extraction system for disaster management using twitter. Presented at [WWW-SMERP 2018](#).
- Classification and Summarization of tweets during a disaster event, presented at [IBM Day 2016](#).

Industry Experience

Hugging Face

New York, NY

Applied Policy Researcher

Mar 2024 – Present

- The Applied Policy Researcher position at Hugging Face involves working within the Machine Learning and Society team to bridge the gap between regulatory and technical realms. The role centers on developing tools to audit ML biases and engaging in policy discussions to facilitate understanding between policymakers and developers, with a focus on democratizing access to advanced machine learning technology.
- Responsibilities include contributing to ongoing public governance efforts by evaluating the social impacts of technology, providing feedback on regulatory proposals, and collaborating on projects such as governance in the BigCode project and evaluating the social impact of generative AI systems.

AdeptID

Boston, MA

Research Data Scientist

Jul 2023 – Feb 2024

- Work with the Data Science and Engineering teams and external policy experts to audit internal systems and ensure that AdeptID's ML models are fair and unbiased and adhere to regulations.
- Conduct original research on ML Fairness and investigate solutions to unanswered questions about potential sources of bias in an industrially deployed ML pipeline.

Twitter

San Francisco, CA

Research Intern

Sep – Dec 2021 and Jun – Aug 2022

- Worked with the META (Machine Ethics, Transparency and Accountability) team at Twitter, to investigate the relationship between demography agnostic and demography dependent author impression fairness metrics at scale.
- Developed home timeline diversity metrics based on user feedback, to find balance between recommendation efficiency and fairness.

Fiddler Labs

Palo Alto, CA

Research Intern

Oct 2020 – Apr 2021

- Explain distributional shifts in Machine Learning model outputs by unifying Shapley based methods.
- Using optimal transport theory, proposed a threshold independent fairness metric that allows for real time explanations.
- Worked with the product team and civil rights lawyers in the deployment of Fiddler's Machine Learning model fairness dashboard. Introduced and incorporated intersectional fairness metrics in the product.

Xerox Research Centre

Bangalore, India

Research Intern

May 2017 – July 2017

- Implemented XTrack, a Smart Vehicle Tracking and Battery usage minimizing Algorithm, using BLE to relay GPS information.
- Proposed a method for Uber-like Surge Price Prediction using Spatio-Temporal techniques like the Neural Hawkes and Recurrent Marked Temporal Point Process. Awarded the title of [Best Internship Project](#).

Google Summer of Code

Remote

GSoC Student at OpenMRS

Apr 2016 - Aug 2016

- Replaced the HTML XForms system used with native generated forms using the Forms REST Api in the android client of the Opensource Medical Record System. Added offline form saving. Configured Travis CI to automatically build and push the apk to the play store.
- Overall, contributed [100K lines of code](#) and became the top code contributor in the project repository.
